DETAILED ACTION

Faxing of Responses to Office Actions

In order to reduce pendency and avoid potential delays, TC 3700 is encouraging FAXing of responses to Office Actions directly into the Group at (703)872-9302 (Official) and (703)872-9303 (for After Finals). This practice may be used for filing papers which require a fee by applicants who authorize charges to a PTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into TC 3700 will be promptly forwarded to the examiner.

1. The specification has been amended to overcome the previous drawing objection. Claim 1 and 5 have been amended for further examination.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Behm et al (5,451,052).

Behm et al discloses in Fig. 2, a lottery ticket comprising a first game area (130) containing a plurality of play indicia (132, 134, 136) on a plurality of rows (131), a second game area (110, 110A, 110B), where in the second game area designating a target indicia (112, 114, 116), which if present in the first game area may result in a prize (\$1,000) won; wherein the prize is located in a prize area (120) for one for the rows of the first game area; wherein the second game area has three rows having three play indicia.

However, Behm et al does not disclose wherein the second game area is adjacent each row of the first game area; play indicia appearing on the face of a playing card or dice; a third play area designating a bonus prize.

In regards to **Claims 1**, it would have been obvious to one having ordinary skill in the art at the time the invention was made to place the first game, second game, and prize area at any

Art Unit: 3722

desired location, since it has been held that rearranging parts of an invention involves only routine skill in the art. *In re Japikse*, 86 USPQ 70.

In regards to **Claims 4, 5 and 8**, it would have been obvious to one having ordinary skill in the art at the time the invention was made to place the play indicia on any type of face figure, since it would only depend on the intended use of the assembly and the desired information to be displayed. Applicant has failed to disclose in the claims that the indicia appearing on the face of another indicium figure is critical to the invention and that it solves any stated problem, and it appears that the invention would perform equally well with any type of face figure or not.

Further, it has been held that when the claimed printed matter is not functionally related to the substrate it will not distinguish the invention from the prior art in terms of patentability. *In re Gulack* 217 USPQ 401, (CAFC 1983). Also, in the present case, there appears to be no new or unobvious structural relationship between the printed matter and the substrate.

In regards to **Claim 8**, it would have been obvious to one having ordinary skill in the art at the time the invention was made to include as many play areas as desired, since it has been held that mere duplication of the essential working parts of a device involves only routine skill in the art. *St. Regis Paper Co. v. Bemis Co.*, 193 USPQ 8.

Response to Arguments

4. Applicant's arguments with respect to claims 1-8 have been considered but are moot in view of the new ground(s) of rejection.
